

New and updated features in the VUIler™ 2023 release:

All

- Added support for the Applied Biosystems SeqStudio Genetic Analyzer
- Added support for Verogen ForenSeq DNA Signature Prep Kit autosomal STR data generated by the MiSeq FGx Sequencing System

Note: Support for SeqStudio and NGS data requires either a new TrueAllele World or update of an existing TrueAllele World. If you are planning on using either SeqStudio or NGS data on existing Worlds, please contact Cybergeneics for support.

Analyze

- Software and templates updated to support data generated by the Applied Biosystems SeqStudio Genetic Analyzer

Data

- Support for Verogen NGS data via upload of Sample Detail Report XLSX files
- Support for batch request of NGS data

Report

- Optimization of request match search for large TrueAllele Worlds
